

F1 Unit Specs — batch 1

Sep 29, 2026 · @Mohammad AlFalasi

Eight unit specs are drafted on template v3 to the F1.17 standard: F1.1–F1.4, F1.14, F1.15, F1.16 and F1.18. Each unit has its own tab, with the spec table, the ten template-v3 sections, 3–8 open objects read at source, and a fact-check list for G3. Together they reach all nine world chapters, but unevenly: Europe appears in all eight, Australia and the Pacific in three, and the steppe only in F1.3, so batch 2 has to carry the steppe.

The eight units

Unit	Depth	Cases	Open objects read at source	Still to verify
F1.1 One object, three readings	O	The proto-cuneiform tablet (WS-001, passes the 1970 test with a caveat); an Iznik mosque lamp (Cleveland 1944.236); a Thonet chair (AIC 1999.556), where the access lens goes	6 (Met, Cleveland, AIC)	The "priest-king" wording; Thonet dates; the tablet's exit from Iraq is unrecorded

Unit	Depth	Cases	Open objects read at source	Still to verify
F1.2 The reference-to-appropriation plane	O	Six sorting cases across five worlds, borrowing in both directions: a Congolese ivory souvenir; a Chinese export charger after a French print; a Company-school painting; the Navajo Nation v. Urban Outfitters case; the Tlahuitoltepec blouse and Isabel Marant (2015); a Grand Tour view	5 (Cleveland)	The Tlahuitoltepec community's own statement, read only in press reports
F1.3 How histories get written	P	Vasari's Lives; the Great Zimbabwe myth and Rhodesian censorship; "Islamic art" as a collectors' category	2 plus a public-domain site plan	Mirabeau's date (1756 or 1757); exact Graeber and Wengrow wording

Unit	Depth	Cases	Open objects read at source	Still to verify
F1.4 Film, performance, sound, games	P	Four National Jukebox recordings, 1903–1917 (blacksmith scene, Livery Stable Blues, Uncle Josh, Caruso); gamelan; kora; a Noh mask; a Westinghouse film; the Royal Game of Ur rules	5 open records plus four public-domain recordings	Jukebox item pages refused access, so dates and matrix numbers come from its search data; possible caricature in two recordings
F1.14 Copying, transfer and counterfeit	P	Dürer and Marcantonio, as Vasari tells it; blue-and-white copied both ways (Jingdezhen, Iznik, Delft, Meissen); Indian chintz, the Calico Acts and Lancashire; training data as copying	6, including a before/after pair: Dürer (AIC 1927.2897) and Marcantonio's copy (Met 17.3.3311)	The Getty v. Stability appeal; no open "Made in Occupied Japan" object
F1.15 Ornament and the exhibition	P	A Damascus bowl once published as "Venetian"; Owen Jones's unnamed Tongan designer, paid in cloth; a Kuba raffia cloth	3 (Cleveland) plus the 1856 Grammar of Ornament	Egash left out (review only read); whether "race" appears in the 1851 catalogue

Unit	Depth	Cases	Open objects read at source	Still to verify
F1.16 Ritual and belief	P	The One Million Pagodas and the Diamond Sutra (868); a Kongo crucifix, with both readings of the mission; an Andean kero	6 (Met, Cleveland)	A pilgrim badge's pre-1970 history
F1.18 Women's making	P	A Girsu tablet listing 4,272 women and 1,800 children weaving (Ur III); May Morris's Honeysuckle credited to her father; a Maria Martinez plate signed "Marie and Santana"	5 (AIC, Cleveland, Met)	Whether the Ur III weavers were free or unfree (probable only)

What the protocol screen removed

The screen ran before any searching, and it took things out of four units. F1.15 dropped an object Owen Jones drew from, which is a preserved Māori head. F1.16 excluded minkisi, mallqui and huaca objects, katsina masks, restricted Aboriginal designs, Sámi drums, Ghost Dance garments, reliquaries and tabots. F1.4 excluded Okina masks. F1.2 carries a content note on the Congo ivory, since the trade rested on forced portage. Tongan, Māori and ni-Vanuatu wording waits for a reader from each community before it is published.

Before G3

- **Fact-check.** Every tab ends with its list: the R1 and R2 canon rows used, living people, community names, UNESCO claims and licences. The first two rounds show these rows err at 8–14% when drafted from memory.
- **Length.** The specs run 3,000–3,400 words against a 3,000 target, most of it URLs. The learner-facing copy is far shorter; the spec is the build brief.
- **Next batches.** Batch 2 is F1.19, F1.19a, F1.19b (if Q36 is agreed), F1.20–F1.22a, F1.23 and F1.24. Batch 3 is F1.25–F1.31, with F1.28a and F1.30a. The partner-voice packs follow batch 1 (Q41).
